### PROFESSIONAL SUMMARY

Cybersecurity student passionate about building secure, scalable, and innovative solutions that protect digital assets and empower individuals and organizations. Skilled in network defense, secure software development, penetration testing, and digital transformation strategies. Committed to becoming a global technology brand owner delivering impactful solutions to the world.

### CORE COMPETENCIES

- Cybersecurity Tools: Wireshark, Nmap, Metasploit, Burp Suite, Kali Linux
- Networking: Cisco CCNA (Routing, Switching, Network Security)
- Web Development: HTML, CSS, JavaScript, PHP, MySQL
- Security Practices: Secure coding, encryption, vulnerability assessment
- Cloud & Infrastructure: AWS Basics, Cloud Security Principles
- Other Skills: Problem-solving, Technical Writing, Team Collaboration

### PROJECTS

**Secure E-commerce Platform** – Designed a full-stack e-commerce website with encryption, secure authentication, and SQL injection prevention.

**Network Vulnerability Scanner** – Developed a Python-based tool to detect and report network security risks.

**Cybersecurity Awareness Platform** – Built an interactive learning platform to teach safe online practices.

### EDUCATION

**Bachelor's Degree in Cybersecurity** – Lincoln University College Malaysia, Nasarawa State University Campus (NSUK) | 2024 – 2028

Relevant Coursework: Network Security, Ethical Hacking, Secure Software Development, Information Systems

### CERTIFICATIONS

- Cisco CCNA (in progress)
- CompTIA Security+ (planned)
- [Any online course certificates — Coursera, Udemy, etc.]

## EXPERIENCE

**Intern – IT Support / Networking** – [Company Name] | [Year]

Assisted in troubleshooting network issues and maintaining secure configurations.

## AWARDS & ACHIEVEMENTS

- Top 10 in University Cybersecurity Hackathon [Year]
- Led a student project on digital security awareness

## HOBBIES & INTERESTS

- Cybersecurity research
- Technology innovation
- Mentoring peers in tech
- Community volunteering
